

The ClearShield Eco-System®

renovation • protection • maintenance

Produces 'non-stick', easy-clean ClearShield Eco-Glass® that maintains the original...

- ✓ **light transmission**
for visibility and daylighting in buildings and energy output of solar panels
- ✓ **clarity**
for a bright and sparkling appearance
- ✓ **cleanability**
for reduced frequency and difficulty of cleaning exterior glazing and improved hygiene for interior glass

Proven to keep glass looking like new for longer

Ordinary,
unprotected glass

ClearShield
Eco-Glass®

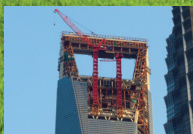

Pioneering and award-winning technology with over 40 years of proven experience.

Glass manufacturers, processors and fabricators worldwide use the unique ClearShield Eco-System® to produce a higher quality of glass that provides a wide range of solutions. Alternatively, existing glass can be renovated and protected on-site with the ClearShield Eco-System®.

Ordinary glass treated with the System is upgraded to ClearShield Eco-Glass® which is 'super-green', on average halving the energy requirements and carbon emissions for routine washing of external glass such as architectural and solar panel glass.

For internal applications, not only is ClearShield Eco-Glass® easy to clean and keep clean, it is also independently proven to resist the adhesion of bacteria for a more hygienic environment. This makes it ideal for glass kitchen splashbacks, shower enclosures and sandblasted glass.

So for 'non-stick', easy-clean, 'super-green' glass in any environment, interior or exterior, old or new, you can rely on the ClearShield Eco-System®.
