

The Ritecoat System™

renovation • protection • maintenance

Produces 'non-stick', easy-clean surfaces that provides durable and exceptional resistance to...

- ✓ weathering & moisture, even in marine environments
- ✓ graffiti
- ✓ chemical attack by acids, alkalis and solvents

Suitable for most metals, plastics and paintwork

Unprotected,
weathered steel

Renovated & protected
with the Ritecoat System™

Ritecoat™

‘Non-stick’, easy-clean surface technology with almost 30 years of proven experience.

Introduced in 1991, the Ritecoat System™ has been specially developed for the on-site renovation, protection and maintenance of many surfaces including aluminium, stainless steel, powder coated, painted and plastic surfaces. This unique System converts ordinary surfaces into durable ‘non-stick’, low-maintenance surfaces.

Working like ‘non-stick’ cookware, surfaces treated with the Ritecoat System™...

- resist staining and discolouration, including weathering, graffiti and chemical attack, keeping their ‘as-new’ appearance and performance for much longer
- are much easier to clean and keep clean, eliminating the need for harsh and abrasive cleaning methods
- look cleaner and brighter for longer between cleaning – improving general appearance and customer satisfaction

The Ritecoat System™ has a proven track record and has been used in a wide range of environments. It even protects surfaces in harsh marine or coastal settings. The System can also save you money as renovation is less expensive (and less hassle) than having to replace surfaces.

**Get your surfaces back to new...
